

Your Your

with Assay Consulting and Educational Services from IntelliCyt

As a scientist you have access to a wide range of instrumentation that you use, sometimes infrequently but always urgently. Keeping up with best practices or developing new applications on one of these investments can be daunting. Sometimes a little support from a platform expert is all that is needed to get projects moving forward.

Introducing

Our experienced team possesses a wealth of knowledge and expertise in cell-based and bead-based assay applications for screening and profiling. We can coach you on getting the most out of your IntelliCyt products and optimize their use with your own biological model systems. We'll work with you to define a project with you that meets your needs.

Access our highly skilled scientific team	<ul style="list-style-type: none">• shortens your learning curve• improves time-to-screening• provides peer-to-peer interaction and knowledge transfer
Customized milestone approach	<ul style="list-style-type: none">• reduces risk• develops assays tailored to your biology and throughput needs
Advanced education	<ul style="list-style-type: none">• increases confidence and expertise• improves productivity• become a company resource

Realize your goals

Streamline analysis?

Need new users trained?

Need more content?

Want to gain experience with kits?

Want to learn the capabilities of the platform?

Convert assays to iQue?

- **Miniaturize** your assays to conserve precious cells and save on reagents.
- **Simplify** assays to no-wash format to save time.
- **Multiplex** to get more data from every well.
- **Develop** custom reagents and assays for your critical projects.
- **Learn** advanced concepts and approaches and become a power user.
- **And** so much more....

“The IntelliCyt scientist really helped us in reducing and streamlined the assay development process. We had an optimized cell-based functional assay on another platform, and were able to adapt it to the iQue Screener with less downtime. Based on the increased throughput, we realized a significant impact in reducing the cost per well.”

Mohanraj Dhanabal, EMD Serono Research & Development Institute

Your

IntelliCyt is committed to your success! This is why we offer a full range of services and support to meet your unique needs.

Let's talk! Call us to discuss your project ideas and how we can assist you to achieve your goals.
