Catalog Number:

92043

Reconstituting the MIP-1 $\alpha$  standard in 2 mL of assay diluent results in a concentration of 5000 pg/mL. Standard curves for nowash and 1-wash protocols were performed in triplicate (+/- S.D.). The limit of detection (dashed line) is 3 standard deviations above the mean of samples without Standard (N=12). Results are typical and may vary based on specific assay conditions.

## Lowest Detectable Test Conc. (pg/mL): 312.5
